JOB VACANCY: ELECTRICAL ENGINEER

Our client, a reputable company in the Manufacturing Industry is seeking to recruit a responsible and experienced **Electrical Engineer** to join the team. The successful candidate will be responsible for designing, developing, testing, and supervising electrical systems and equipment. This role requires strong technical expertise, problem-solving skills, and the ability to ensure compliance with safety standards and industry regulations.

KEY RESPONSIBILITIES:

- Ensure all machines are operating safely, efficiently, and in optimal condition
- Maintain clean and well-organized electrical panels at all times
- Troubleshoot and repair breakdowns promptly to minimize production downtime
- Track, record, and analyze machine breakdowns to identify root causes and prevent recurrence
- Work with PLCs, Servo Drives, and other industrial automation technologies for programming, diagnostics, and parameter setting
- Read and interpret electrical schematics to support troubleshooting efforts
- Perform preventive maintenance and cleaning on daily, weekly, and monthly schedules
- Monitor and manage spare parts inventory to ensure timely replacements
- Coordinate preventive maintenance planning and ensure timely availability of required parts
- Resolve electrical control and industrial communication issues within the production environment

MINIMUM REQUIREMENTS:

- Degree or Diploma in Electrical Engineering or a related field
- Minimum 6 months of experience in an engineering or maintenance role
- Strong knowledge of electrical systems, codes, and safety procedures
- Proficiency in both oral and written English communication
- Professional certification or registration is an added advantage
- Excellent problem-solving, communication, and teamwork skills
- Recommendation letter from previous employer or attachment

HOW TO APPLY

Interested and qualified candidates should send their scanned CV and certificates combined into a single PDF document to us through: recruit@consolidatedhrsolutions.co.ke by **Wednesday, 10th September 2025**

Indicating the subject as: **ELECTRICAL ENGINEER APPLICATION**
